EDUCATION

Annasaheb Dange College of Engineering and Technology, Aasta
B.Tech in Artificial Intelligence and Data Science (CGPA: 8.25)

Sangli, India
2022 – 2026

EXPERIENCE

Software Developer Intern

Jan 2026 – Jun 2026

Quantbit Technologies Pvt. Ltd.

Sangli, India

- Built responsive ReactJS frontend interfaces for internal ERP modules, dashboards, and custom workflows.
- Developed custom print formats and reports in ERPNext using the Frappe Framework with Python backend APIs.
- Customized DocTypes, workflows, and forms in ERPNext to meet client-specific business requirements.
- Integrated React frontend components with Frappe/ERPNext backend using JavaScript and MySQL queries.

PROJECTS

• ERP_UI – Dynamic React Frontend for Frappe/ERPNext

2025–2026

Tools: React, TypeScript, Vite, Frappe Framework, ERPNext, REST APIs

- Engineered a metadata-driven ERP platform that dynamically generates forms, list views, and navigation directly from Frappe DocType definitions, eliminating hardcoded UI development.
- Built a custom React runtime for Frappe Client Scripts supporting custom buttons, field triggers, lifecycle hooks, and server-side API interactions.
- Integrated React and Frappe into a single deployment with session-based CSRF authentication and metadata caching for optimized client-side performance.

• Budget Buddy – Personal AI-Powered Finance Platform

2025–2026

Tools: React, JavaScript, Tailwind CSS, Shadcn UI, Supabase, Clerk, Chart.js

- Developed secure user authentication via Clerk and real-time data storage with Supabase.
- Implemented transaction management, recurring payments, savings goals, and interactive spending analytics dashboards using Chart.js.
- Built modular React components and a fully responsive UI with Tailwind CSS and Shadcn UI primitives.

• Production Shift Attendance Log (Hackathon Winner – QUANTQUEST)

2025

Tools: React, Next.js, Tailwind CSS, Shadcn UI, React Hook Form, Chart.js

- Developed a modern responsive web application for employee attendance and shift management in production environments.
- Implemented interactive dashboards with real-time data visualization and a component-based architecture using Shadcn UI primitives.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript

Web Development: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Shadcn UI

ERP & Backend: ERPNext, Frappe Framework, REST APIs

ML & Data Science: NumPy, Pandas, TensorFlow, OpenCV

Databases: MySQL, SQL, Supabase

Development Tools: VS Code, Git, GitHub, Google Colab, Vite

CERTIFICATIONS

• **NPTTEL:** Human Resource Development (Elite), Principles of Management (Elite)

2024–2025

• **Simplilearn:** Python for Beginners

2023

• **HackerRank:** SQL (Basic, Intermediate)

2024–2025

ACHIEVEMENTS

• **Hackathon Winner – QUANTQUEST, Quantbit Technologies Pvt. Ltd.**

2025

Won for developing Production Shift Attendance Log, modernizing workforce management with real-time dashboards and shift scheduling.

• **Web Shapers | Runner-Up**

2023

Secured runner-up position in the Web Shaper event by designing a college portfolio website. Organized at ADCET.
